

DNSSEC in .SE

Jakob Schlyter
proxied by Johan Ihrén

.SE

- NIC-SE is the registry for .SE
- Approximately 320 000 domains
- Swedish government pushes for DNSSEC

So far...

- Signed .se zone in test operation since January 2003
- Key management system development
- Smartcard-based DNSSEC key signer
- Work within the IETF

What's next?

- Server software upgrade at slaves
 - Beginning of summer 2005
- Signed zone in production environment
 - End of summer 2005
- Key management for domain administrators
 - Late autumn 2005

Within one year

- Sign important DNS infrastructure
 - Government, mass media, banks...
- Enable DNSSEC validation at Swedish ISPs
- Implement DNSSEC for ENUM
